In her powerful and inspiring book, *Presuming Competence*, Suzanne Donovan challenges the harmful stereotypes and assumptions that often prevent people with disabilities from reaching their full potential.

Donovan argues that we need to start by presuming competence in all people, regardless of their disability. This means believing that people with disabilities are capable of learning, working, and contributing to society, and providing them with the opportunities and support they need to do so.

Donovan's book is full of real-life stories of people with disabilities who have overcome tremendous challenges to achieve success. These stories are both inspiring and heartbreaking, and they serve as a reminder of the importance of presuming competence in all people.

*Presuming Competence* is a must-read for anyone who works with or cares about people with disabilities. It is a powerful call to action for a more inclusive and just world.

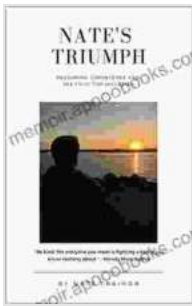

## **About the Author**

Suzanne Donovan is a professor of special education at the University of North Carolina at Charlotte. She is the author of several books on disability,

including the award-winning book *The Arc of a Slow Inevitable Grace*.
